

"TEQUILA WINE" was first made by the Conquistadores w/in a few decades of their arrival to the New World. They discovered a fermented native drink made from the Agave plant called *pulque*, & soon found a way to distill it into a stronger spirit. In almost 500 years following the conquest, tequila has become an icon of Mexican nationality, pride & culture, recognized worldwide. Today most of it is made in the Jalisco state around the towns of Tequila, & Arandas, using only one species of plant, *the blue agave*.

types of tequila

BLANCO OR PLATA *White or Silver* The most common & original form, it is "unaged" & is under 60 days old.

REPOSADO Aged from about two months to a year in large oak casks, imparting a richer & more complex flavor. The longer the aging the darker the color.

AÑEJO Aged for a minimum of one year & as long as eight to ten years. The barrels used for Añejos are previously used bourbon or whiskey barrels. New barrels are rarely used because they make the tequila too woody too quickly. Usually age correlates with price.

FOR \$2 MAKE ANY OF THE FOLLOWING INTO A MARGARITA OR MARGATINI
